Subjest Index to Volume 2

A Amblyopia
differential diagnosis of (Harada & Hayashi) 268
Aqueous
humor: effect of electrical stimulation of hypothalamus on protein content in (Hukazawa) 201
humor: biochemical change after death (Aoyagi) 213
plasmoid: biochemical study of (Yoshizawa) 300
ATP
on cone action potential (Mitarai & Sugita) 35

B Behçet's
syndrome: clinical study of (Kato) 122
Biomicroscopy
of follicles (Kunitomo & Hori) 72
of human eye using polarized light (Mishima) 192

C Cataract
naphthalene: inhibitive action of glucuronic acid upon development of (Mizukawa et al.) 301
Color
sensation and clinical use (Umazume) 6
vision (Kuwabara) 58
Cone
action potential: effect of ATP on (Mitarai & Sugita) 35
Conjunctiva
normal & trachomatous: histology as revealed in section of electron microscopy (Mitsui et al.) 81
Cornea (-1)
Arthus phenomen in (Shikano) 166
biochemical study after death (Aoyagi) 213
incorporation of inorganic S^{35} sulfate into sulfated mucopolysaccharides in (Suda) 172
tissue: impedance test of (Hara et al.) 160
wave of rabbit (Uyemura & Kawashima) 1
Creatine
phosphokinasa in retina (Akiya & Ishiguro) 21

E Electron
microscopy: of ultrasection of sympathetic ophthalmia (Ikui et al.) 13
microscopy: histology of normal and trachomatous conjunctiva as revealed in section of (Mitsui et al.) 81
EMC
integrated: action of extraocular muscle in monocular movement by mean of quantification of (Momosse) 108
Eye
depth of focus of (Oshima) 63

F Follicle
biomicroscopic observation of (Kunitomo & Hori) 72

H Hue
discrimination: between both eyes (Kato & Tabata) 254

I Iridociliary
body: effect of electrical stimulation of hypothalamus on tissue respiration of (Fukazawa) 201

K Keratitis
superficialis diffusa: riboflavin metabolism in (Eguchi) 226

L Lacrimal
gland: histological study on distribution of nerve in (Kato) 103
pathway: function of (Nagashima) 289
Lens
crystalline: zone electrophoretic study on soluble protein of (Mizukawa) 307
M Muscle
extrinsic eye: nerve ending in (Fukuda) 93
N Nerve
ganglion cells in root of 3rd, 4th and 6th cranial II (Fukuda) 42
Neuritis
retrobulbar: experimental study of (Imachi et al.) 143
O Ocular
axis: objective measurement by X-ray photograph (Shibata & Amano) 263
tissue: phosphate activity in (Majima) 192
Oculo
motor center (Urata) 284
P Phase
contrast microscopy: obserbation of visual cells by means of (Takeuchi et al.) 47
contrast microscopy: of vitreous (Yamada) 52
R Retina (-1)
central arterial pressure (Sasamoto) 154
circuration: as a sequela of late toxemia of pregnancy (Suzuki) 277
creatine phosphokinase in (Akiya & Ishiguro) 21
metabolism in inner and outer layer of (Kurachi) 127
S Sympathetic
ophthalmia: electron microscopic study of (Ikui et al.) 13
Syndrome
Behçet's: clinical study of (Kato) 122
Squint
eyes: tonography of (Ikuta) 221
T Tonography
on squint eye (Ikuta) 221
Trachoma
electron microscopic study of (Mitsuiet al.) 81
U Uveitis
idiopathic: experimental study of pathogenesis of (Yoshida) 177
V Vernal
catarrh: allergic reaction of skin and conjunctiva with pollen in (Oguchi) 207
Vision
twilight: and road safty (Nomura) 134
Visual
acuity: optical investigation of limit of (Yamamori) 241
cells: observation by mean of of phase microscopy (Takeuchi et al.) 47
purple: effect of amino acid on regeneration of (Yamaji et al.) 237
Vitamin
A content in liber and B_1 concentration in blood of mice maintained on VA & B_1 deficient diet (Ide & Shimo-oku) 197
Vitreous
phase contrast microscopy of (Yamada) 52
